## GENERAL INFORMATION

## INTRODUCTION

Please read and understand the instructions in this manual carefully and thoroughly before attempting to operate this device. These instructions contain important safety and use information. This unit is intended for use by professionally trained personnel only, and is not suitable for private use.

## UNPACKING

Every device has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton is damaged, carefully inspect the device for damage, and be sure all accessories necessary to install and operate the device have arrived intact. In the event damage has been found or parts are missing, please contact our customer support team for further instructions. Please do not return this device to your dealer without first contacting customer support. Please do not discard the shipping carton in the trash. Please recycle whenever possible.

## BOX CONTENTS

Omega Brackets (x2)
Locking Power Cable
Snoot with screws

## CUSTOMER SUPPORT

Contact ELATION Service for any product related service and support needs.

## IMPORTANT NOTICE!

There are no user serviceable parts inside this unit.
Do not attempt any repairs yourself; doing so will void your manufactures warranty. Damages resulting from modifications to this fixture and/or the disregard of safety instructions and guidelines in this manual void the manufactures warranty and are not subject to any warranty claims and/or repairs.

## LIMITED WARRANTY (USA ONLY)

A. Elation Professional hereby warrants, to the original purchaser, Elation Professional products to be free of manufacturing defects in material and workmanship for a period of two years ( 730 days), and Elation Professional product rechargeable batteries to be free of manufacturing defects in material and workmanship for a period of six months (180 days), from the original date of purchase. This warranty excludes discharge lamps and all product accessories. This warranty shall be valid only if the product is purchased within the United States of America, including possessions and territories. It is the owner's responsibility to establish the date and place of purchase by acceptable evidence, at the time service is sought.
B. For warranty service, send the product only to the Elation Professional factory. All shipping charges must be pre-paid. If the requested repairs or service (including parts replacement) are within the terms of this warranty, Elation Professional will pay return shipping charges only to a designated point within the United States. If any product is sent, it must be shipped in its original package and packaging material. No accessories should be shipped with the product. If any accessories are shipped with the product, Elation Professional shall have no liability what so ever for loss and/or damage to any such accessories, nor for the safe return thereof.
C. This warranty is void if the product serial number and/or labels are altered or removed; if the product is modified in any manner which Elation Professional concludes, after inspection, affects the reliability of the product; if the product has been repaired or serviced by anyone other than the Elation Professional factory unless prior written authorization was issued to purchaser by Elation Professional; if the product is damaged because not properly maintained as set forth in the product instructions, guidelines and/or user manual.
D. This is not a service contract, and this warranty does not include any maintenance, cleaning or periodic check-up. During the periods as specified above, Elation Professional will replace defective parts at its expense, and will absorb all expenses for warranty service and repair labor by reason of defects in material or workmanship. The sole responsibility of Elation Professional under this warranty shall be limited to the repair of the product, or replacement thereof, including parts, at the sole discretion of Elation Professional. All products covered by this warranty were manufactured after January 1, 1990, and bare identifying marks to that effect.
E. Elation Professional reserves the right to make changes in design and/or performance improvements upon its products without any obligation to include these changes in any products theretofore manufactured.
F. No warranty, whether expressed or implied, is given or made with respect to any accessory supplied with the products described above. Except to the extent prohibited by applicable law, all implied warranties made by Elation Professional in connection with this product, including warranties of merchantability or fitness, are limited in duration to the warranty periods set forth above. And no warranties, whether expressed or implied, including warranties of merchantability or fitness, shall apply to this product after said periods have expired. The consumer's and/or dealer's sole remedy shall be such repair or replacement as is expressly provided above; and under no circumstances shall Elation Professional be liable for any loss and/or damage, direct and/or consequential, arising out of the use of, and/or the inability to use, this product.
G. This warranty is the only written warranty applicable to Elation Professional products and supersedes all prior warranties and written descriptions of warranty terms and conditions heretofore published.

## WARRANTY RETURNS

All returned service items whether under warranty or not, must be freight pre-paid and accompany a return authorization (R.A.) number. The R.A. number must be clearly written on the outside of the return package. A brief description of the problem as well as the R.A. number must also be written down on a piece of paper and included in the shipping container. If the unit is under warranty, you must provide a copy of your proof of purchase invoice. Items returned without a R.A. number clearly marked on the outside of the package will be refused and returned at customer's expense. You may obtain a R.A. number by contacting customer support.

## SAFETY GUIDELINES

This fixture is a sophisticated piece of electronic equipment. To guarantee a smooth operation, it is important to follow all instructions and guidelines in this manual. Elation Professional is not responsible for injury and/or damages resulting from the misuse of this fixture due to the disregard of the information printed in this manual. Only qualified and/or certified personnel should perform installation of this fixture and only the original rigging parts (omega brackets) included with this fixture should be used for installation. Any modifications to the fixture and/ or the included mounting hardware will void the original manufactures warranty and increase the risk of damage and/or personal injury.

PROTECTION CLASS 1 - FIXTURE MUST BE PROPERLY GROUNDED

THERE ARE NO USER SERVICEABLE PARTS INSIDE THIS UNIT. DO NOT ATTEMPT ANY REPAIRS YOURSELF; DOING SO WILL VOID YOUR MANUFACTURER'S WARRANTY. DAMAGES RESULTING FROM MODIFICATIONS TO THIS FIXTURE AND/OR THE DISREGARD OF SAFETY INSTRUCTIONS AND GUIDELINES IN THIS MANUAL VOID THE MANUFACTURE'S WARRANTY AND ARE NOT SUBJECT TO ANY WARRANTY CLAIMS AND/OR REPAIRS.

DO NOT PLUG FIXTURE INTO A DIMMER PACK!
NEVER OPEN THIS FIXTURE WHILE IN USE! UNPLUG POWER BEFORE SERVICING FIXTURE!
NEVER TOUCH FIXTURE DURING OPERATION, AS IT MAY BE HOT! KEEP FLAMMABLE MATERIALS AWAY FROM FIXTURE!

NEVER LOOK DIRECTLY INTO THE LIGHT SOURCE!
RETINA INJURY RISK - MAY INDUCE BLINDNESS!
SENSITIVE PERSONS MAY SUFFER AN EPILEPTIC SHOCK!

INDOOR / DRY LOCATIONS USE ONLY! DO NOT EXPOSE FIXTURE TO RAIN AND MOISTURE!

MINIMUM DISTANCE TO OBJECTS/SURFACES MUST BE 3.3 FEET (1 METERS) MAXIMUM TEMP OF EXTERNAL SURFACE $185^{\circ} \mathrm{F}\left(85^{\circ} \mathrm{C}\right)$ MINIMUM DISTANCE OF INFLAMMABLE MATERIALS
FROM THE SURFACE 1.6 FEET (0.5 METER)

## SAFETY GUIDELINES

DO NOT TOUCH the fixture housing during operation. Turn OFF the power and allow approximately 15 minutes for the fixture to cool down before serving.

DO NOT shake fixture, avoid brute force when installing and/or operating fixture.
DO NOT operate fixture if the power cord is frayed, crimped, damaged and/or if any of the power cord connectors are damaged and do not insert into the fixture securely with ease. NEVER force a power cord connector into the fixture. If the power cord or any of its connectors are damaged, replace it immediately with a new one of similar power rating.

DO NOT block any air ventilation slots.
All fan and air inlets must remain clean and never blocked.
Allow approx. $6^{\prime \prime}(15 \mathrm{~cm})$ between fixture and other devices or a wall for proper cooling.
Always disconnect fixture from main power source before performing any type of service and/ or cleaning procedure. Only handle the power cord by the plug end, never pull out the plug by tugging the wire portion of the cord.

During the initial operation of this fixture, a light smoke or smell may emit from the interior of the fixture. This is a normal process and is caused by excess paint in the interior of the casing burning off from the heat associated with the lamp and will decrease gradually over time.

Consistent operational breaks will ensure fixture will function properly for many years.
ONLY use the original packaging and materials to transport the fixture in for service.

## MAINTENANCE GUIDELINES <br>  <br> DISCONNECT POWER BEFORE PERFORMING ANY MAINTENANCE!

## CLEANING

Frequent cleaning is recommended to insure proper function, optimized light output, and an extended life. The frequency of cleaning depends on the environment in which the fixture operates: damp, smoky or particularly dirty environments can cause greater accumulation of dirt on the fixture's optics. Clean the external lens surface at least every 20 days with a soft cloth to avoid dirt/debris accumulation.
NEVER use alcohol, solvents, or ammonia-based cleaners.

## MAINTENANCE

Regular inspections are recommended to insure proper function and extended life.
There are no user serviceable parts inside this fixture, please refer all other service issues to an authorized Elation service technician. Should you need any spare parts, please order genuine parts from an authorized Elation dealer.
Please refer to the following points during routine inspections:
A detailed electric check by an approved electrical engineer every three months, to make sure the circuit contacts are in good condition and prevent overheating.
Be sure all screws and fasteners are securely tightened at all times. Lose screws may fall out during normal operation resulting in damage or injury as larger parts could fall.
Check for any deformations on the housing, color lenses, rigging hardware and rigging points (ceiling, suspension, trussing). Deformations in the housing could allow for dust to enter into the fixture. Damaged rigging points or unsecured rigging could cause the fixture to fall and seriously injure a person(s).
Electric power supply cables must not show any damage, material fatigue or sediments.
NEVER remove the ground prong from the power cable.

## OVERVIEW

## FAN CONTROL AND LOW NOISE OPERATION

The Elation Fuze Wash 500 is a high-performance fixture suited for multiple applications. For noise critical environments such as Theater, Opera, or Orchestral Halls, it offers various fan operation modes which remove unwanted noise distractions for the audience and performers. Fan Modes can be changed remotely via the DMX control channel, allowing the fixture to offer high output or whisper-silent operation at a moment's notice. All Fan Modes smoothly transition over a brief period, preventing unwanted attraction to the fixture.

Auto - The default AUTO mode ensures optimal performance of the fixture. Fans only run at the speeds needed to keep the LED engine within a safe temperature range. They will turn off if possible, for example, when the fixture is dimmed to a low intensity. Fans sense the ambient and fixture temperature, and will, always, try to keep noise levels at a minimum. The fixture output will only reduce when the LED engine cannot be cooled down to its safe operating range due to high ambient temperature. Note: Auto is the recommend mode for daily operation of the Elation Wash 500.

High - This mode is only required in very high ambient temperatures when automatic fan speed adjustments are not desired. High Fan Speed will cool the fixture most efficiently. This mode will increase wear on the fans and should only be utilized in exceptional circumstances. Fans will always run, even if the fixture is dimmed. Fixture output is kept at $100 \%$ unless the LED engine temperature is too high, at which point the fixture will reduce power carefully to ensure safe operation.

Low - In this mode the fixture reduces fan speeds throughout for a lower noise profile of the fixture. This mode should be sufficient for most uses where lower noise is required. The fixture output is reduced to about $80 \%$.

## Additional Low Noise Modes

For very critical situations, the Fuze Wash 500 offers two additional low noise modes for silent operation. The fixture output will be reduced, but as the Fuze Wash 500 has such an extremely high luminous flux, it still offers outstanding performance. In low noise modes, all parameters of the Rembrandt operate quieter and with reduced speeds.

Studio - This mode reduces the fixture output to approximately $50 \%$. Almost all fans inside the Rembrandt are turned off, and only run when necessary to keep the fixture at 50\% LED power.

Mute - Running the fixture in MUTE mode reduces the fixture to about $25 \%$ output, and all fans are off. The fixture is totally silent.

## ACCESSORY INSTALLATION: SNOOT

 the Snoot installed.

To install either the Beam Shaper or Barndoor, it will be necessary to remove the Snoot.

1. Place fixture on a stable flat surface and let cool for 15 mins.
2. Using a hand screwdriver, remove 4 screws.
3. Carefully remove and set aside Snoot in safe location.

If either accessory is removed, it will be necessary to reinstall Snoot:

1. Place fixture on the stable flat surface and let cool for 15 mins .
2. Align Snoot onto front lens, making sure that the indentation on the inner edge of the snoot is aligned with the gear on the front of the unit. This should also result in the 4 screw holes on the snoot being correctly aligned with the 4 screw holes on the fixture.
3. Carefully, using a hand screwdriver, insert/secure included 4 screws.
4. Check Snoot to confirm it is seated properly and all 4 screws are secure.
$\triangle$

## ACCESSORY INSTALLATION: BEAM SHAPER

1. Place fixture on the stable flat surface and let cool for 15 mins .
2. Align Beam Shaper onto front lens so that the indentation on the inner edge of the beam shaper is aligned with the small gear at the front of the lens. This should also result in the 4 screw holes on the beam shaper being correctly aligned with the 4 screw holes on the fixture.
3. Carefully, using a hand screwdriver, insert/secure included 4 screws.
4. Check Beam Shaper to confirm it is seated properly and all 4 screws are secure.

$\triangle$

## ACCESSORY INSTALLATION: BARNDOORS

WHEN BARNDOORS ARE INSTALLED, MAKE SURE TO SET THE UNIT TO BARNDOOR MODE IN THE SYSTEM MENU.
FAILURE TO DO SO MAY IMPEDE SOME FUNCTIONS OF THE FIXTURE AND CAUSE DAMAGE TO THE BARNDOOR.

Barndoor Connector Socket

Accessory Safety Cable Attachment Point

1. Place fixture on the stable flat surface and let cool for 15 mins .
2. Before mounting Barndoors, orient the Barndoor assembly to match its Safety Cable/Coil Cable and Connector to the coresponding receptical and Safety Cable Attachment Point on the moving head. Make sure that the indentation on the inner edge of the barndoors is aligned with the gear on the front of the fixture. This should also result in the 4 screw holes on the barndoors being correctly aligned with the 4 screw holes on the fixture.
3. Carefully, using a hand screwdriver, insert/secure included 4 screws.
4. Check Snoot to confirm it is seated properly and all 4 screws are secure.

## ACCESSORY INSTALLATION: BARNDOORS

5. Insert the Power/Data Coil-Cable and Connector of the Bardnoor to the Barndoor Power/ Data Connector Socket located on the side of the Moving Head, and fasten the Barndoor Safety Cable to the Safety Cable Attachment Point.

6. To disconnect the Power/ Data Connector, depress the toggle-lock to disengage it, and with a firm grasp of the connector body, pull connector straight from socket. Follow steps in reverse order to remove the Barndoor.

## INSTALLATION GUIDELINES

Keep fixture minimum 5.0 feet (1.5m) away from flammable materials and/or pyrotechnics.

## ELECTRICAL CONNECTIONS

A qualified electrician should be used for all electrical connections and/or installations.

今

## USE CAUTION WHEN POWER LINKING OTHER MODEL FIXTURES AS THE POWER

 CONSUMPTION OF OTHER MODEL FIXTURES MAY EXCEED THE MAX POWER OUTPUT ON THIS FIXTURE. CHECK SILK SCREEN FOR MAX AMPS.

MINIMUM DISTANCE TO OBJECTS/SURFACES MUST BE 1 FOOT (0.3 METERS)

今

## MINIMUM DISTANCE OF INFLAMMABLE MATERIALS FROM THE SURFACE 1.6 FEET

 (0.5 METER)$\overbrace{0}^{0}$

## MAXIMUM AMBIENT TEMPERATURE $113^{\circ} \mathrm{F}\left(45^{\circ} \mathrm{C}\right)$

$\triangle$

## DO NOT INSTALL THE FIXTURE IF YOU ARE NOT QUALIFIED TO DO SO!

Fixture MUST be installed following all local, national, and country commercial electrical and construction codes and regulations.
Before rigging/mounting a single fixture or multiple fixtures to any metal truss/structure or placing the fixture(s) on any surface, a professional equipment installer MUST be consulted to determine if the metal truss/structure or surface is properly certified to safely hold the combined weight of the fixture(s), clamps, cables, and accessories.
Overhead rigging requires extensive experience, including amongst others calculating working load limits, installation material being used, and periodic safety inspection of all installation material and the fixture. If you lack these qualifications, do not attempt the installation yourself. Improper installation can result in bodily injury.
Fixture(s) should be installed in areas outside walking paths, seating areas, or away from areas were unauthorized personnel might reach the fixture by hand.
NEVER stand directly below the fixture(s) when rigging, removing or servicing.
Overhead fixture installation must always be secured with a secondary safety attachment, such as an appropriately rated safety cable.
Allow approximately 15 minutes for the fixture to cool down before serving.

## INSTALLATION GUIDELINES

OMEGA BRACKETS INSTALLATION
Insert the Omega Brackets into the matching holes on the bottom of the fixture. Secure the Omega Brackets to the fixture by turning each quick-lock fastener $1 / 4$ turn clockwise; making sure the fastener is completely locked. Omega Brackets can be installed into the fixture base as illustrated below.

## CLAMP INSTALLATION

When mounting fixture to truss, be sure to secure an appropriately rated professional grade rigging clamp to the included Omega Brackets using an M10 screw fitted through the center hole of the Omega Brackets. The fixture provides built-in rigging points for a SAFETY CABLE (not included). Be sure to only use one of the designated rigging points for the safety cable and never secure a safety cable to a carrying handle.
RIGGING
Overhead rigging requires extensive experience, including among others calculating working load limits, installation material being used, and periodic safety inspection of all installation material and the fixture. If you lack these qualifications, do not attempt the installation yourself. Improper installation can result in bodily injury.

## INSTALLATION GUIDELINES

## FIXTURE INSTALLATION

The Elation Fuze Wash 500 is fully operational in three different mounting positions, hanging upside-down, mounted sideways on trussing, or set on a flat level surface. Be sure this fixture is kept at least 0.2 m (7.9in.) away from any flammable materials (decoration etc.). Always use and install the supplied safety cable as a safety measure to prevent accidental damage and/or injury in the event the clamp fails. Never use the carrying handles for secondary attachment.

## ART-NET \| sACN CONNECTION

When connecting fixture to a network switch to control multiple devices, a Gigabit Ethernet Switch that supports IGMP (Internet Group Management Protocol) is required. Using a Gigabit Ethernet Switch that does not support IGMP can cause erratic behavior of all connected devices to the switch. Click link below for more information about IGMP.
https://en.wikipedia.org/wiki/Internet_Group_Management_Protocol

## INSTALLATION GUIDELINES

## POTENTIAL INTERNAL FIXTURE DAMAGE FROM EXTERNAL SOURCES OF LIGHT BEAMS

External sources of light beams from direct sunlight, lighting moving head fixtures, and lasers, which are focused directly towards the exterior housing and/or penetrate the front lens opening of ELATION lighting fixtures, can cause severe internal damage including burning to optics, dichroic color filters, glass and metal gobos, prisms, animation wheels, frost filters, iris, shutters, motors, belts, wiring, discharge lamps, and LEDs.
This issue is not specific only to ELATION lighting fixtures, it is a common issue with lighting fixtures from all manufacturers. Although there is no true way to fully prevent this issue from happening, the guidelines below can prevent any potential damage from occurring if followed. Contact ELATION Service for more details.
DO NOT EXPOSE THE FIXTURE AND/OR FRONT LENS OPENING TO LIGHT BEAMS FROM DIRECT SUNLIGHT, OTHER LIGHTING MOVING HEAD FIXTURES, AND LASERS WHILE UNPACKING, INSTALLATION, USE, AND EXTENDED IDLE TIMES OUTDOORS. DO NOT FOCUS A LIGHT BEAM FROM ONE LIGHTING FIXTURE DIRECTLY TOWARDS ANOTHER.

## SYSTEM MENU

The fixture includes an easy to navigate system menu. The LCD touch panel display located on the front of the fixture (see image below), provides access to the main system menu and is where all necessary system adjustments are made to the fixture. During normal operation, pressing the ENTER (Check Mark) button once will access the fixture's main menu. Once in the main menu you can navigate through the different functions and access the sub-menus with the UP and DOWN buttons. Once you reach a field that requires adjusting, press the ENTER button to activate that field and use the UP and DOWN buttons to adjust the field. Pressing the ENTER button once more will confirm your setting. You may exit the main menu at any time without making any adjustments by pressing the ESC (Back Arrow) button.

To access the LCD Menu Control Display via the internal battery, press and hold the BATTERY ICON button for 3 seconds. The LCD Menu Control Display will shut OFF automatically about 1 minute from the last button press.

A USB FLASH DRIVE CAN BE USED TO UPDATE THE FIXTURE TO THE LATEST SOFTWARE. Using a USB Flash Drive loaded with the latest software, insert it into the USB Service Port, then navigate to PERSONALITY/SERVICE, enter the passcode (050), and select UPDATE SOFTWARE. A copy of the latest software can be obtained by contacting Elation Support.

AN ELATION C-LOADER II CAN ALSO BE USED TO UPDATE THE FIXTURE TO THE LATEST SOFTWARE. To order this device, please contact Elation Support for further details.

Detailed instructions can be found online at www.elationlighting.com.

## COLOR LED PROGRAMMING GUIDELINES

The fixture utilizes an advanced additive LED light engine that contains Red, Green, Blue, Mint and Amber LED which when combined, provides a brilliant high CRI White. Using a 5-color LED engine allows the fixture to have a wide color gamut which offers robust saturated colors as well as a wide range of pastel and theatrical colors.
Programming a 5 -color LED engine is a bit more time consuming than the more common 3-color CMY (Cyan, Yellow, Magenta) or RGB (Red, Blue Green) systems. To help ensure optimal performance of the fixture, it is highly suggested to try out the multiple DMX control modes to understand specifically how they work with color before programming a full show. A couple of suggested modes are listed below.
The CMY Extended DMX control mode provides a "natural" color mix which is compatible with color pickers of most lighting consoles and includes 16-bit color control.
The Extended RGBMA (Red, Green, Blue, Mint, Amber) DMX control mode provides slightly higher precision color mixes but may be require additional time to find the right values for all 5-color LEDs to achieve a specific desired color.

## REMOTE DEVICE MANAGEMENT (RDM)

NOTE: In order for RDM to work properly, RDM enabled equipment must be used throughout the entire system, including DMX data splitters and wireless systems.
Remote Device Management (RDM) is a protocol that sits on top of the DMX512 data standard for lighting, allowing the DMX systems of the device to be managed, modified, and monitored remotely (hence, remote device management). This protocol is ideal for fixtures installed in locations that are not easily accessible.

With RDM, the DMX512 system becomes bi-directional, allowing a compatible RDM enabled controller to send out a signal to devices on the wire, as well as allowing the fixture to respond (known as a GET command). The controller can then use it's SET command to modify settings that would typically have to be changed or viewed directly via the unit's display screen, including the DMX Address, DMX Channel Mode, and Temperature Sensors.

FIXTURE RDM INFORMATION:

| RDM Code | Device ID | Device <br> Model ID | Personality ID |
| :---: | :---: | :---: | :--- |
|  |  |  | With Barndoor: <br> 21Ch Standard(1); 30CH Extended(2); 19CH <br> 0×22A6 |
|  | 0013 0000-FFFF | 13 | CMY(3); 26CH CMY Ex(4); 19CH RGB(5); <br> 26CH RGB EX(6) <br> Without Barndoor: |
|  |  |  | 17Ch Standard(1); 26Ch Extended(2); 15Ch <br> CMY(3); 22Ch CMY Ex(4); 15Ch RGB(5); <br> 22Ch RGBEx(6) |

Please be aware that not all RDM devices support all RDM features, and therefore it is important to check beforehand to ensure that the equipment that you are considering includes all of the features that you require.
The following parameters are accessible in RDM on this device:

Error Codes subject to change without notice

| Error Codes subject to change without notice |  |  |  |
| :--- | :--- | :---: | :---: |
| ERROR CODES | DESCRIPTION |  |  |
| PAN | Movement is not located in the default position after the reset. |  |  |
| Tilt | These messages will appear after a fixture reset if the magnetic-indexing circuit <br> malfunctions (sensor failed, or magnet is missing) or there is a motor failure (defective <br> motor or a defective motor IC drive on the main PCB). This error may also be displayed if <br> the head/yoke was blocked during a reset function. |  |  |
| Zoom | Movement is not located in the default position after the reset. These messages will <br> appear after a fixture reset if the magnetic-indexing circuit malfunctions (sensor failed, <br> or magnet is missing) or there is a motor failure (defective motor or a defective motor <br> IC drive on the main PCB). |  |  |
| Beam Shaper | These messages will appear if there is a temperature and/or fan malfunction. |  |  |
| Barndoor |  |  |  |
| LED Temp |  |  |  |
| LED FAN |  |  |  |
| BASE FAN |  |  |  |

## SPECIFICATIONS

## SOURCE

500W 6,500K RGBMA (Red, Green, Blue, Mint, Amber) LED Engine
30,000 Hour Average LED Life*
*Test lab conditions. May vary depending on several factors including but not limited to: Environmental Conditions, Power/Voltage, Usage Patterns (On-Off Cycling), Control, and Dimming.

## PHOTOMETRIC DATA

17,000 Total Lumen Fixture Output
CRI 92
Zoom Range $6^{\circ}-53^{\circ}$
Field Angle $12.1^{\circ}-63.6^{\circ}$
Beam Angle $6.3^{\circ}-53.7^{\circ}$

## EFFECTS

Motorized Zoom
Optional Indexable Ovalizer Lens
Optional Motorized Barn Doors
Variable 16-bit Dimming Curve Modes
High Speed Electronic Shutter and Strobe

## COLOR

RGBMA Color Array
CMY and RGB Emulation
Virtual Color Correction 2400K - 8500K
Green/Magenta Shift
Virtual Gel Swatch Book

## CONTROL / CONNECTIONS

## DMX Channel Modes

With barndoor: 6 channel modes - 21Ch, 30Ch, 19Ch CMY, 26Ch CMY Ex, 19Ch RGB, 26Ch RGB Ex
Without barndoor: 6 channel modes - 17Ch, 26Ch, 15Ch CMY, 22Ch CMY Ex, 15Ch RGB, 22Ch RGB Ex
16-bit Pan, Tilt, and Dimming Control
DMX Adjustable LED Frequency
DMX, RDM, E-FLY Wireless, Art-Net, sACN Protocol Support
4 Button Touch Control Panel
Full Color $180^{\circ}$ Reversible LCD Menu Display
Locking 5pin XLR Connector In/Out
Locking RJ45 Ethernet Connector In/Out
Locking IP65 Power Connector In/Out
USB Connection (Firmware Updates)
SIZE / WEIGHT
Without Snoot:
Length: 13.8" (350mm)
Width: 16.1" (407.9mm)
Vertical Height: 21.7" (550.5mm)

## With Snoot:

Length: 15.3" (389.5mm)
Width: 16.1" (407.9mm)
Vertical Height: 21.7" (590mm)
Center Spacing: 23.6" (600mm)
Weight: 40.8 lbs. ( 18.5 kg )

## ELECTRICAL / THERMAL

AC 100-240V - 50/60Hz
Max Power Consumption 609W
$14^{\circ} \mathrm{F}$ to $113^{\circ} \mathrm{F}\left(-10^{\circ} \mathrm{C}\right.$ to $\left.45^{\circ} \mathrm{C}\right)$
BTU/hr (+/- 10\%) 2151.71

## APPROVALS / RATINGS

CE |cETLus | IP20 | FCC

## OPTIONAL ACCESSORIES:

| ORDER CODE | ITEM |
| :--- | :--- |
| FUZ567WH (USA) <br> 1521000412 (EU) | Elation Fuze Wash 500 WH |
| TRIGGER CLAMP | Heavy Duty Wrap Around Hook Style Clamp |
| SIP126 | $5 \mathrm{ft} .(1.5 \mathrm{~m})$ IP65 Twist Lock Power Link Cable |
| AC5PDMX5PRO | $5 \mathrm{ft} .(1.5 \mathrm{~m})$ 5pin PRO DMX Cable |
|  | Additional Cable Lengths Available |
| 8030500064 | Beam Shaper |
| 8050000652 | Motorized Barn Doors |

## BARNDOORS, BEAM SHAPER, \& SNOOT: <br> Barn Door (optional) + Beam Shaper (optional) + Snoot (included)

## FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

## FCC RADIO FREQUENCY INTERFERENCE WARNINGS \& INSTRUCTIONS

This product has been tested and found to comply with the limits as per Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device uses and can radiate radio frequency energy and, if not installed and used in accordance with the included instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be deter-mined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following methods:

- Reorient or relocate the device.
- Increase the separation between the device and the receiver.
- Connect the device to an electrical outlet on a circuit different from which the radio receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## Energy Saving Matters (EuP 2009/125/EC)

Saving electric energy is a key to help protecting the environment. Please turn off all electrical products when they are not in use. To avoid power consumption in idle mode, disconnect all electrical equipment from power when not in use. Thank you!
