PCI EXPRESS BACKPLANE QUICK START GUIDE

Thank you for purchasing the Datapath Express backplane.

The Datapath range of Express backplanes are static sensitive and are packed in anti-static materials. It is recommended the backplane remains in its packaging until you are ready to install it into a chassis.

The backplanes are fixed to the chassis by screwing them down on to the mounts located in the host chassis. Ensure the rear of the backplane is facing the rear of the chassis.

Full fitting instructions and connector descriptions can be found in the Express Backplane User Guide which can be downloaded from our website at www.datapath.co.uk/images/manuals/Express_Backplanes_User_Guide.pdf.
